/ WORK EXPERIENCE

>> Front-end Q/A Tester - Developer / Freelance

Full Story Marketing | April 2021

- Testing UI websites using modern tools including BrowserStack Screenshots Responsiveness across popular devices and browsers to find bugs and report on the UX.
- Testing websites performance using BrowserStack SpeedLab and Google Chrome Dev Tools Lighthouse.
- Testing websites accessibility with https://accessibilitytest.org/.

Overall I managed to find some inconsistencies in the layout on different browsers, overlapping content on small devices responsiveness which I then rectified, resulting in improvement of customer retention rates and overall satisfaction from the UX and UI teams.

- Developing an additional website landing page from Adobe Xd. files using Bootstrap framework to maintain a consistent workflow from the main website.

>> Front-end Web Developer / Freelance

www.aryvidot.com | August 2020 to present

- Designing websites with client's input - Sharing deliverables - Deploying websites
- Developing commercial landing page

>> Team Lead - Client Account Handlers - Equipment

JJ Media Group | January 2012 to August 2020

- Managed a team of 3 Rental Account handlers
- Trained 5 new members of staff over the years on equipment specifics, lighting and photographic knowledge and monitored their progress.
- Dealt between 7-10 new rental enquiries from agencies, production companies per day and answered the requests from 30-40 clients per week.
- Doubled the department productivity from the order acquisition to the delivery process by managing the rental software to make the assets and add-on items easier to find.
- Saved the Transport department around £500 each month on sub rental equipment collections due to my relationship with the local suppliers.
